Reply to Attn of: EA3-08-049

TO: JB/Supply and Equipment Management Officer

FROM: EA3/AMS Project Manager

SUBJECT: Temporary Storage Review – Case Files 5-002

The above temporary storage items have been reviewed and it has been determined by this office the Alpha Magnetic Spectrometer (AMS) hardware needs to continue in storage. The AMS is an active international project, and a place of storage is needed as manufacturing and integration activities continue. This office requests a 12-month extension of the storage period.

A handwritten signature in blue ink, appearing to read "Trent Martin", with a long horizontal flourish extending to the right.

Trent Martin
